# 1. Overview

Welcome to the *Project Management Kit* (PM Kit).

This brochure tells you *what* the PM Kit is, *how* you will benefit from using it and *why* it will help you achieve **project management success**. You'll also understand why the PM Kit saves you time and effort, making project management much easier than before.

## 1.1 What is the PM Kit?

The PM Kit is a *suite of project management templates* which you can use to get a "head-start" on projects. Rather than starting from scratch every time you start a project task, you can simply open a PM Kit template and fill-in-the-gaps. For instance, say you want to:

- **Create a Project Plan.** Why start with a blank sheet of paper, when you could get a pre-completed Project Plan with the phases, activities and tasks already laid out?
- **Manage Change.** If you want to control change within your project, why not use an existing process which describes the steps needed to manage change, rather than having to create a new process from scratch?
- **Report on Progress.** Why spend hours structuring your reports, when you can simply take the *Project Status Report* template from the PM Kit and fill in the gaps?

The project management templates included in this kit are currently used by more than 45,000 people in over 50 countries to deliver projects more successfully. They're *pre-formatted* so that you only need to *fill in the gaps* to create high quality deliverables for your project.

## 1.2 Who uses it?

The PM Kit is used by project managers, consultants and trainers around the world to improve project management success.

### 1.3 Why should I use it?

Using this PM Kit will *save you time*.

Imagine how much time you would save by having pre-formatted documents ready to fill in whenever you want to create a new project deliverable. The PM Kit gives you this power by providing you with templates that already have the table of contents, section headings, charts and tables *ready to go*. It also includes detailed instructions to help you complete deliverables quickly and efficiently. By using the PM Kit, you will:

- ✓ **Save time** creating deliverables
- ✓ **Reduce effort** creating deliverables
- ✓ **Improve the quality** of deliverables
- ✓ Improve your project success.

### 1.4 How will I benefit from it?

By saving time creating deliverables, you will complete your project sooner than expected, with less effort and higher quality deliverables as a result. Using the PM Kit:

- **Project Managers** can deliver projects on time and in budget
- **Team Members** can produce higher quality deliverables faster
- **Business Managers** can improve the efficiency of projects
- **Consultants** can create deliverables which consistently meet client needs
- **Trainers & Lecturers** can teach best practice project management principles

- ✓ Constantly improve the quality of your deliverables
- ✓ Complete tasks faster and more efficiently than before.

## 1.5 How do I use it?

Put simply, you take each template and fill in the gaps to create high quality project deliverables as you need them.

Each template comes with a *structure* (Table of Contents), a *format* (Header, Footer, body of content and tables), and a set of *procedures* describing how to complete it. All you need to do is read the procedures in the template and fill in the details specific to your project. You can add, rename and remove whole sections of content if you wish. You can personalize your Header/Footer and replace the Method123<sup>®</sup> logo with your own company logo.

You're free to make whatever changes you wish to customize these templates to fit into your project environment. The fewer alterations you make, the more value you will get from these templates as a time-saving, best practice method for managing projects.
